VS code

## WORK EXPERIENCE

### Sep. 2022 - Present | 遠創智慧股份有限公司 FETC International Co., LTD.

#### Senior Product Designer / UI/UX design team leader

Mastering the overall design and business strategy of the product, I focus on ensuring the product meets market demand and business goals. I collaborate with Business Development (BD) to present design concepts to business partners and fully participate in the design and development of the product.

As the design team leader, I hold design sharing meetings every two weeks. These sessions help team members bring up any challenges they're facing so we can brainstorm solutions together. This approach improves how we handle issues when working independently. It encourages team members to openly discuss design-related problems in meetings and collectively come up with better ideas.

### Apr. 2022 - Aug. 2022 | TenMax ad Tech Lab Co., LTD.

#### Senior UI/UX Designer

B2B platform design include DSP and SSP platform.

Communicate and interact with different functions, deliver a high-quality UI design and related elements with a consistent experience. Participate in and define product design practices and guidelines. Participate in the complete product life cycle.

Communicate and interact with business people and technical people, and explain the reasons for product UI design.
